

HOT WATER

At Solarwise we have been helping Australians with their hot water needs since 1979. We offer Solar, electric and gas hot water options to suit any application for your home or business.

One of our team will be more than happy to come to you or take the time over the phone and step you through all of your options and pricing.

Solar Hot Water is the best option to save money over the longer term. Whilst it is a little more expensive to begin with you will greatly reduce your energy bills and greenhouse gas emissions with Solar. We offer flat panel systems or evacuated tube both on roof, split and heat pump options.

Gas and Electric Hot Water are better options for less of a capital outlay upfront. These systems can however be rather expensive to run, particularly LPG bottled gas or peak electricity tariffs. Speak with Solarwise for specialist advice on all the alternatives and the one that suits your family or business best.

Gas Hot Water is perfect for any size family. Based on the size of your home and daily habits we will advise you the best size for your needs and the Gas Hot Water system that makes the most financial sense long term.

We will provide you with an accurate cost over the phone or will visit you in person to discuss the different options available on the market today.

Our knowledge stems from over 30 years of installing Gas Systems.

Solarwise has been an avid supporter of hot water and solar technology since 1979, making a name for ourselves as industry leaders throughout Brisbane. The company was originally formed and known as Queensland Insulation & Solar, with solar water systems stealing the show as its most prominent product.

Now we offer a range of items that are great for the environment and your hip pocket, saving you money as your home saves energy.

SOLARWISE PRODUCTS

Solarwise has been a local family business since 1979. We provide a wide range of products to improve your home or business or to help you get more use out of your pool.

Solarwise is trusted in the industry for the care we take, the wise advice we offer and the quality product we install. Over the country there are hundreds of thousands of happy customers with our products and we are proud to be of service to them.

SPECIALISING IN POOL HEATING, HOT WATER, SOLAR POWER, AIR CONDITIONING, SKYLIGHTS & INSULATION

FAMILY BUSINESS SINCE 1979

POOL HEATING

Solarwise specialises in three main sets of products that best solve your pool heating problems and allow you to enjoy your pool more often, entertain your friends and have fun with the kids.

HEAT PUMPS

Solarwise heat pumps are perfect to keep your pool at whatever temperature you desire. Whether for your family, yourself, or your clients, we can heat (or cool, or both) your pool for exercise swimming, recreational or hydrotherapy and specialised situations such as aquariums. We can give you an option that suits both your budget and the outcome you have in mind. Many of our heaters are Australian made.

SOLAR POOL HEATING

Solarwise Solar Pool Heating is an excellent option to extend your swimming season to up to 10 months a year without the extra running costs of a heat pump. Solar is also rather cost effective and a smaller capital cost. Often customers opt for both solar and a heat pump for all year round swimming. Our Solar is Australian made.

POOL BLANKETS & ROLLERS

Solarwise blankets and rollers are made in Australia for any size pool. We offer bubble (solar) blankets and thermal blankets in many thicknesses and we supply and install residential up to heavy duty commercial rollers for any application, even a custom solution.

- ✓ Bubble Blankets
- ✓ Thermal solar blankets – Which are up to 200% more resistant to heat losses.
- ✓ Heavy duty stainless steel rollers with domestic & commercial options.
- ✓ Motorised pool rollers

SOLAR POWER

At Solarwise we provide a range of solar power systems both for our residential clients and larger commercial systems for businesses, factories and the like. Generally, for a residential home you'd be looking at no more than a 6Kw system. Often our clients opt for a 3 to 6Kw system connected to the grid but there are also many good reasons to look at a hybrid or completely stand alone systems with battery storage. Industry experts predict a prosperous future for battery back up systems.

For a commercial system this would start around 10Kw and upwards of 100Kw. We can fully design and install a system that suits your needs and one that lasts the test of time.

Because we have been in the industry for such a long time we can provide you with tailored advice and solutions that suit your budget and requirements. Contact Solarwise today.

AIR CONDITIONING

Solarwise offers all the major brands including Samsung, Carrier, Mitsubishi and Toshiba both in split or ducted systems. Whether for you and your family, in your home or apartment, or for a big warehouse or office facility, we can design and install the right unit for what you need.

INSULATION

We have been experts in insulation since 1979.

Solarwise offers all types of insulation both supplied and installed including thermal and acoustic, glasswool, polyester and more.

Our prices and advice on insulation are second to none so you know that your home is in good hands with Solarwise.

SKYLIGHTS

Solarwise offers a range of different skylights to bring more natural light into your home to make your environment more enjoyable and comforting. We offer sizes from say a walk-in-robe to a lounge room or kitchen area specifically designed to suit your room.
